

### *Amendments to the Claims*

The following listing of claims will replace all prior versions, and listings of claims in the application.

1-59. (Cancelled)

60. (Currently Amended) A method for nucleic acid synthesis, sequencing or amplification, said method comprising:

(a) taking from a temperature between -20°C to +4°C a composition comprising a thermostable DNA polymerase, a deoxynucleoside triphosphate, at least one antibody that binds said thermostable polymerase, and a buffer salt, wherein said polymerase to antibody concentration ratio is between 1:1 and 1:10; then

(b) adding to said composition nucleic acid molecules ~~such that said composition is not diluted more than 2x.~~

61. (Cancelled)
